Profile

I completed my undergraduate degree in finance and entrepreneurship at the University of Miami and have worked or interned in private wealth management, a family office, a broker dealer, and a private lending startup.

I am motivated by numbers and problem solving, and I am fascinated by technology and how it is changing the modern world. Recently, I decided to pursue training in software development. I am currently searching for a position where I can apply my software development and other skills, and which offers an opportunity for professional and personal growth.

Education

University of Miami

Miami, FL | May 2020

Bachelor of Business Administration

Major in Finance

Minor in Entrepreneurship
